LETTERS FROM PRISONERS OF WAR

(Continued from page 10)

word about the size 13 shoes. Anyway that should have convinced you that it was really your dumb husband writing. As you probably know, Tommy P____ is here rooming with me. He is feeling fine and looking well. Tell Jean that he has gained about twenty pounds since he had his picture taken and is his normal self again. Here are two of my latest pics for you and mother. We were all elated to hear about Joe and Bill, may they keep up the good work. This is my community letter, so pass it on. It is good to know that you have found something useful to do that you seem to enjoy. Of course it seems impossible to us here that life goes on as usual, but it boosts the spirits a hundred per cent to hear about it. My thoughts are always with you. I am well and safe. Note: Letters to prisoners should be typewritten to facilitate delivery through censors.

(Later from the above prisoner)

For the past eleven years I have longed to settle down. Now I have, sad and oh-so dumb. In spite of the Navy's notification, you probably have been worried, but you have no cause to worry any longer. I am here with Herbie H , our plane crews, the officers and men from Guam and Wake, and some Allied personnel, entirely safe: just waiting and hoping for an early and satisfactory end to the war

Here we are in barracks with a room about 30 x 20 for six of us, Herbic, two Dutch officers, two Australians, and myself; the entire group of prisoners have complete freedom in a large compound. We have daily classes in a wide variety of subjects of our own selection, then exercise, play cards, or "accy-ducey." We are living each day for the happiness in it-may you do the same until we can be reunited.

Communication will necessarily be much more difficult in this war than in the last; it may be impossible to send a ship in either direction for a long, long time, but try to write, for my heart is with you.

My only desire is that you should make a happy and complete life for yourself. We cannot predict when or how the war will end, we only know now that it will last long enough for there to be many changes at home before we return.

Offag IX A/Z Germany

May 5, 1943

Dear Mother and Dad: We don't do very much here except eat 2 meals a day and then spend rest reading and playing cards. get paid 72 marks a month but ca spend it so I usually lose mine 2 tin a week playing roulette. I still h to think of being a prisoner al having only been on the front 5 we but it's too late to think of it me The part of Germany we are is really pretty although we do get to see much of it. I am attendi German classes and hope to be al to speak it soon, or read the Germ newspapers which are the only or

Studies and Sports in German Prison Camps

he reports of Delegates of the emational Red Cross Committee, and civilian internee camps ler German control, demonstrate phatically that studies, which en-eprisoners to improve their knowland sports, which aid them ically, are growing increasingly

one German camp, recently vis-by an I. R. G. G. Delegate, two new barracks had been erected site each other. Above the ence of one of them were the words, sing Room and University." The iversity" was set up, at the prisonrequest, as a simple center for lies. To organize this, the prisonelected representative issued an al for help to all teachers, stus, experts, and others who were petent and willing to assist in the es. In one case motor mechanics ged the secrets of internal comon engines to classes of prisonwhile another group interested printing listened to a printer ain his craft. The same univerorganized discussions on elemenmathematics, mechanics, chemand physics.

lese discussions gradually develinto large conferences which place on Saturday nights. The exts for discussion were selected prisoners themselves and ed all the way from philosophproblems to colonial politics and evelopment of art. In some cases, were given by German profeswho came from nearby towns.

University Courses

due course these discussions into full lectures; and courses, nating with examinations sent home schools, were drawn up. completed papers are now sent

for marking, through the intermediary of the L. R. C. C. at Geneva, to a school or college in the prisoners' own country. American schools are not yet participating in this educational program, but arrangements are in hand for the Y. M. C. A. to organize the educational activities of American prisoners of war in Europe. Several months ago a shipment was made to Geneva of about 7,000 textbooks to enable prisoners to study courses which the Armed Forces Institute has found are those most frequently demanded by American colisted men.

A recent report from London stated that over 70 societies and institutions -- academic, professional, and technical-are now holding examinations for prisoners of war, ranging from surveying to chiropody or spectacle making, and from history and languages to accountancy and

bookkeeping. Over 20,000 requests for books and study courses have been received by the Educational Books Section of the Prisoners of War Department at Oxford, and the number of applications for examinations now runs into thousands.

Officers can devote more time to study because, unlike enlisted men, they are not required to work by the detaining Power. In some officer camps, therefore, courses may occupy as many as 100 hours a week, so that the prisoners can keep completely occupied with studies. Enlisted men assigned to labor detachments can attend lectures before breakfast or after supper, and a large part of them do. Letters from American prisoners show that they have been taking advantage of courses offered with the help of the London organizations.

Sports Day at Stalag Luft III.

Japanese Prisoner of War Camps—Taiwan (Formos

By John Cotton

The first report on camps in Taiwan (Formosa) has been received from an International Red Cross Committee Delegate who visited the camps there at the end of May 1943. There are five camps, the main one being at Taihoku, the capital, near the northern end of the island. The others are located in alluvial coastal regions at Karenko, a port on the east coast, Taichu, near the west coast, Tamazato, in the east central part of the island, and Heito in the south.

Several of the camps were opened in the summer of 1942, but one, Tamazato, was opened on April 2, 1943. The prisoners were brought to Taiwan from the Philippines, Hong Kong, Malaya, Sumatra, and Java. Altogether, there are estimated to be about 1,500 British, Dutch, and American prisoners of whom some 500 are Americans. All the camps contain a large proportion of officers, particularly the camp at Tamazato where there are 71 high ranking officers, 21 being Americans. The British ex-governors of Hong Kong and Malaya are at this camp, and, according to the report, the camp representatives include 15 generals and ex-governors. A later report by cable states that two of the camps, presumably Heito and Taichu, are to be closed, and lists have been received of some American noncoms and soldiers moved to the Tokyo area, probably from these two camps.

The transfer from tropical areas has no doubt been beneficial to the prisoners since the climate of Taiwan, a large island off the south coast of China and north of the Philippines, is mild, ranging in temperature from a low of 40 degrees in winter to 95 degrees in summer. The principal industry is agriculture, the chief crop, rice. The coastal areas, particularly in the south and west, and the lower hill regions are quite fertile, producing large quantities of sugar cane, bananas, sweet potatoes, tea, pineapples, barley, coffee, cotton, mangoes, and papaya. A large part of the island, particularly the central and eastern portions, is mountainous; some 6,000,000 acres are covered by primeval forests. Especially noteworthy are the camphor trees which grow with a luxuriance known nowhere else in the world.

Camp Conditions Improving

The five camps are run on practically identical lines. The Japanese commander is apparently a strict disciplinarian who keeps the camps in good order. The subcommanders are reported to be ambitious men who are keen on improving their camps. They appear to be doing their best for the prisoners, and the prisoners' representatives in all the camps confirm that conditions are gradually improving.

The camps are situated in fairly large areas enclosed by bamboo or brick walls, and, in one case, by barbed wire. The area of the camp at Karenko is 21 acres. The prison quarters consist mainly of wooden military barracks with good ventilation. Heat is ordinarily unnecessary. The toilet facilities appear to be adequate but far from luxurious. Hot Japanese baths are permitted twice a week and cold showers whenever

Cooking is done by Army cooks among the prisoners. The food available consists of substantial quantities of rice and barley; irregular quantities of meat and fish; vegetables, potatoes, fruit; small quantities of eggs, butter, and cheese; and black tea, but practically no coffee. The prisoners are raising some livestock and poultry to provide more meat and eggs. At the Heito camp, pigs, ducks, and chickens are being raised, and there is also a vegetable garden of about two acres where sweet potatoes, peanuts, watermelons, etc., are grown. On the whole, the food supplies, although sufficient to live upon, do not appear to be entirely adequate for a balanced diet. The small amount of Red Cross relief goods distributed from shipments sent to Japan on repatriation ships in 1942 slightly improved the situation, but were not sufficient to correct the deficiency. One general, however, speaking for the Tamazato camp, declared they had saved the situation.

In all cases prisoners brought their own clothing from the south and some clothes have also been issued by the detaining authorities. It is reported that in the camps men wear lapanese clogs and that some shoes sent by the Red Cross are being kept in reserve. The spokesman that heavier clothing would needed before next winter.

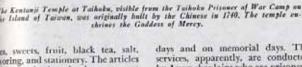

It is reported that when the c were opened there were a cor able number of cases of colities diptheria, aggravated by exhan as a result of the journey fron south and the sudden change of and climate. Since then then been a gradual improvement a oners have become acclimated conditions have improved. P tive inoculations were made a dysentery, typhoid fever, choler smallpox. Yeast preparations used for beri-beri cases.

Malaria is reported to be en in Heito, and to a lesser exte three of the other camps. Qu and other drugs similar to those by the Japanese army have been vided for treatment. The Dele reported that he would send atal and, if possible, plasmochin certain small amounts of ma-supplies purchased in Japan by I. R. C. C. In addition, the sanitary measures have been to for preventing the developmen and to exterminate, the anor rier. Eucalyptus trees and citro grass have been planted wide promises of further assistance. Each camp has an infirmary

several doctors and attendants of whom are prisoner doctor orderlies. There is a regular me inspection once a day, and at time in case of emergency. Is and optical treatment in most are available in nearby town though complaints have been ceived that the treatment i always satisfactory.

Canteen Facilities

The financial condition of sities, while the men spend the bough the International Y. M.C.A. for tobacco and such other international Commission. Religious servare available. Each camp has a reacheld in the camps on Sunteen with a limited supply of

toring, and stationery. The articles ich can be bought, however, are sufficient. Excess funds are deand in Postal Savings Banks, and total savings have now reached a ily large figure. officers and the few civilians in

camps may work if they desire. e enlisted men and noncommisned officers must work if they are mosquito, which is the malaria. The pay for work is the same as Japanese army receives, and grass have been planted wide joints to from 15 to 30 sen (\$0.04 camps. The prisoners have been \$0.08) per day. At the Heito camp vided with mosquito nets, and the of the prisoners' tasks for which thrum from only a college of the prisoners' tasks for which thrum fumigating coils are us by are paid is to remove stones the barracks. A tropical medic on gravel plains which are being search institute at Taihoku informed into sugar cane fields. visited by the Delegate, who real the time of the Delegate's visit, aw 347 men from this camp at the in straw hats and shorts. He il they were lean but in good ysical condition.

The prisoners' recreation consists yely of walking, gardening, and arts such as football and basketball, well as indoor recreation which dudes cards and chess. Several of camps have gramophones which played in the evening. Reading the apparently is inadequate, conng of a few books and English tions of Japanese newspapers, in-ding the Nippon Times and Osaha amichi. The Delegate reported that prisoners appears to be good. O which The Delegate reported that use part of their allowances for marr his return to Tokyo a few hunclothing, cigarettes, and daily and books were sent to the camps days and on memorial days. The services, apparently, are conducted by Army chaplains who are prisoners.

Very little mail has been received in these camps, and the prisoners in all cases have expressed a great desire for better mail service. In most camps postcards are permitted once a month. Some of the high ranking officers have been allowed to dispatch radio communications and letters.

The requests of the prisoners invariably were for more mail, more food, medicine, clothing, games, and recreation equipment.

Karenko

A comparatively large number of Americans are at Camp Karenko. Out of a total of 248 prisoners in this camp. 166 were Americans, of whom 132 were officers. The camp is located near the town of Karenko, which has 30,000 inhabitants and is situated near the sea. The camp was opened on July 26, 1942, and is near a hill in park-like scenery. Out of a camp area of 21 acres enclosed by a brick wall, prisoners' buildings cover threefourths of an acre. Quarters consist of two-story permanent wooden military barracks. Each man has a bed with a straw mattress, a mattress cover, two sheets, and four thin blankets. Only the officers have pillows.

Good drinking water comes from a nearby reservoir. The cooking is done by seven Army cooks among the prisoners. The food is estimated to contain about 2,800 calories per day

per man. In this camp the prisoners' weight is stated to have increased from an average of 144 lbs. on arrival to 1461/2 lbs. at the end of May 1943. The camp has a vegetable garden which covers five acres and, in addition, the men are raising goats, pigs, rabbits, and chickens, which should help to improve the diet.

The camp has work benches for tailors and cobblers, and chairs for barbers. Agricultural work is voluntary, at the rate of 2 yen (\$0.50) per month. As in the other camps, the spokesmen expressed the desire for more food (particularly for those working), more clothing, as well as towels, soap, books, games, and sports

equipment.

The visit of the International Red Cross Committee Delegate should result in improved conditions at these camps. As reported above, on the Delegate's return to Tokyo, some books and medicines were forwarded. A later cable stated that at Camp Tamazato new roomy quarters, which were being constructed, would be available in July, with a consequent improvement in conditions.

Deliveries to British Prisoners of

Figures recently received from Geneva show that during the year 1942, 25,807 tons of relief supplies in parcels (containing food, tobacco, clothing, and miscellaneous items) were shipped from Geneva to British prisoners of war held by Germany and Italy. Of the total amount of 25,807 tons shipped, only 39 tons were lost, through pilferage and other causes, in transit to the camps. The amount thus lost was less than onefifth of one percent.

THE S. S. GRIPSHOLM

The exchange of American and Japanese nationals at Marmagoa, in Portuguese India, was set for October 15, 1943. The diplomatic exchange ship GRIPSHOLM is carrying relief supplies for Ameri can prisoners of war and civilian internees in the Far East valued at over \$1,500,000, as well as next o' kin packages. Full details of the supplies shipped will be given in our next issue.

The American Red Cross has confirmed that the relief supplier shipped a year ago for Americar prisoners in the Philippines were received and distributed last January, and that their arrival was most timely.

Newspapers in European Prison Camps

By Marion Hale Britten

Most prisoners of war and civilian internee camps in Germany and Italy have their own newspapers which serve as a link between the different camps and their working detachments. In some camps prisoners are also permitted to subscribe to approved local newspapers, but, as a rule, they much prefer their own sheets which furnish them with campnews and information about entertainments, sports, educational activities, the arrival of Red Cross supplies, and so forth.

There are two kinds of camp newspapers in Germany. The first is issued biweekly by the German authorities and published in the large towns which have prison camps in the vicinity. It circulates from one prisoner of war camp to another throughout the country, and it is the publication which deals with all matters of a general character—such as repatriation, world news, official notices, etc. It usually runs to about 10 pages, with large headings in heavy type and a layout somewhat along the lines of an American daily. It is illustrated with photographs.

The "Home Town" Sheet

Besides this general newspaper for prisoners there are also the camp sheets which appear usually about once a week, and which are posted on a large notice board fixed against the wall of the canteen. The following description of one of these sheets has been obtained from the International Red Cross Committee, which keeps a complete file in Geneva of all camp news sheets:

This one happens to be called The Flag, the newspaper of, let us say, Camp X. On the front page under the national colours is the motto "Hold Out." In the middle of the page a bold heading announces that the prisoners' representative (the elected camp leader) has a message. In it he not only gives good advice and encouragement, but also, for example, states that prisoner Bill M. has saved the life of a child who was drowning, and that an anonymous prisoner has made a gift to the paper's editor of 50 Reichsmarks for the family of a less fortunate fellow.

Let's turn over. Here we come to the home news section. Prisoners usually leave this to read last, as they can then return to their work refreshed by the thoughts of home. Turning over again we come to more spicy stuff—jokes about the camp doctor's nose; the monocle of Captain X, who rather fancies the cut of his uniform; and many other little tidbits about colleagues.

Further on there is a lesson in grammar headed "Modern Languages without Tears," and, still further, printed on red paper, we read a heading "Hello, Hello, This Is the Doctor Speaking," followed by some sound hygienic advice. Then follow the sports reporter and the musical reviewer. There are also recipes, one describing "how to convert Red Cross sardines into fresh trout." And, finally, a puzzling heading worded "Do you know it?" This informs us, among other things, that water polo was first played in England in the 18th century as an imitation of horse polo; and that the artificial creeper commonly described as barbed wire is a ramb' r very common in Central

All Work Done by Volunteers

A great amount of painstaking effort and resourcefulness is devoted to getting out these camp sheets. Prewar lawyers, doctors, actors, as licity experts now labor side in "the editor's den" to entert, enlighten their comrades. Son, oners devote their Sundays to cating copies of the paper. Oth returning from a mine or a briat the end of a hard day's work with pen and pencil for several. The entire camp, reports the Department of the L. R. C. G. ingly and enthusiastically coop to achieve the success of its pa

The following notes, taken letters from prisoners of so Italian camps, show that into camp news sheets there is just a as in German camps:

"My first book review was lished by the camp newspape week, and I hope to make in contributions of this feature, gards the news which is posted of it is from the Italian press, to week we have details of cond in England, as given by two a who were brought down some ago and are now at this camp.

"The 'Grif' enters its third'ushortly. It is going strongly. We been running a series of motors articles which, with their ill tions, would do credit to any a best motoring journals.

Group of American aviators, including at least two pilots of Flying Fortressels are among the approximately four hundred American flyers at Stalag Luft III, Get
